INTERPRETATION OF COMPARISONS OF 1961 COMMODITY STATISTICS WITH THOSE FOR 1960

The introduction of the new Export Commodity Classification in January, 1961, created serious difficulties in making accurate comparisons between statistics for 1961 and those of earlier years. This report presents such comparisons as can be made on the basis of existing information, and these blue pages set forth both the basis for these comparisons and an assessment of their nature and reliability.

It should be emphasized at the outset that all comparisons and assessments presented here must be regarded as preliminary. They represent the first results of the analysis of data for two months (August, 1959, and April, 1960) which were coded to both the old and new classifications and cross-tabulated, supplemented by some study of office rulings and special records. The analysis of this material is still not complete; when it is finished a reference paper will be published containing a more accurate and more fully documented cross-reference between the old and new classifications. This reference paper will also serve as the basis for revising comparisons presented in the January-December, 1961, issue of this report.

The comparison key used here also differs in some respects from the information presented in the Export Commodity Classification itself. The Classification showed, for each 1961 class, the 1960 classes in which the content of the 1961 class had previously been coded. In many cases this resulted in showing against 1961 classes the codes of 1960 classes which accounted for only a minor portion of the 1961 totals. Such a detailed presentation was necessary for the guidance of the staff engaged in preparing export statistics; for analytical use it was often of little value. The key used in this report omits details believed to be of minor significance.

Figures presented in this report involve five basic types of comparison between statistics for 1961 and those for 1960 (the alphabetic symbols which follow are used in the "equivalence" column of the key):

<u>Equivalence</u>	<u>Meaning</u>
a	1961 and 1960 statistics believed to be fully comparable within the limits of any qualifications set forth in footnotes.
b	1961 and 1960 statistics believed to be substantially comparable (coverage about 90% the same) within the limits of any qualifications set forth in footnotes.
c	1961 class has no direct equivalent in 1960 figures.
d	A non-existent or "dummy" class for which no 1961 data are compiled, but which contains all or part of one or more 1960 classes. The relationship of these values to 1961 statistics is set forth in footnotes.
e	Figures shown for both 1961 and 1960 but the figures are not directly comparable. The relationship of 1961 and 1960 values is usually described in footnotes.

All comparisons made suffer from one major limitation: the analysis on which they are based was conducted at the class total level, not on the class-by-country level. It is believed that the "a" and "b" type comparisons are generally accurate for exports to individual countries as well as for commodity totals, but the "e" type comparisons are certainly unreliable at the country level (though in individual cases they may in fact be adequate).

(ii)

There are three cases where special conversion problems appear:-

(i) Tea (1961 class 110-39, 1960 class 750) -

Until January 1, 1961, tea was classified as Canadian produce if it had been blended or packed in Canada. Because minor operations such as blending or packing are not usually considered sufficient to transform imported goods to the domestic produce category, it was decided that such tea should in future be included in statistics of re-exports. This report deals only with exports of Canadian produce, and therefore the 1961 figures shown for tea are much smaller than was the case in 1960 under the former rules.

(ii) Platinum (1961 classes 256-29 and 455-29, 1960 class 6310) -

Until January 1, 1961, Canadian export statistics did not distinguish between exports of platinum contained in ores, and exports of platinum as refined metal. It is known that the platinum classified as Canadian produce (and included in this report) was chiefly in the form of ores and concentrates, while that classified as re-exports (not included in this report) was chiefly refined metal. Thus in this report 1960 exports of platinum are compared with class 256-29, whereas in a study of re-exports they would be compared with class 455-29.

(iii) Export Packing (1961 class 970-10, 1960 class 9080) -

Until January 1, 1961, any packing material shown separately on export entries was assigned to class 9080, but in 1961 packing has, whenever possible, been included with the value of the goods exported, the main exception being for re-usable containers which have an appreciable value. In this report former class 9080 is nevertheless shown against new class 970-10, although the drop in the total of this class reflects a change in procedure rather than a real change in trade.

PRELIMINARY KEY TO COMPARISON OF 1961 AND 1960 STATISTICS

- NOTES: (i) Column 1, "1961 Class", shows the number under which the figures referred to are presented in 1961 reports. The key lists all classes in 1961 numeric order.
- (ii) Column 2, "1960 Class", shows the number or numbers under which the figures referred to were presented in 1960 reports. In a few cases a percentage follows the 1960 class number; this indicates that only the specified proportion of the 1960 class is included under the relevant 1961 number.
- (iii) Column 3, "Equivalence", contains an alphabetic code indicating the type of comparison (see p. i) and a numeric footnote reference if required.

- 1 - Part of the 1960 value for this class is included in class 13-99. This may affect comparisons for some countries.
- 2 - 1960 values for this class may be either overstated or understated in individual cases. In such cases there will be balancing errors in other classes of division 01.
- 3 - 1960 value for class 17-99 is equivalent to the sum of 1961 values for classes 17-39, 17-69 and 17-99.

4 - 1960 value for class 31-44 includes 1960 value for class 31-45.

5 - Dummy class 32-50 covers for 1960 the content of 1961 classes 31-50 and 33-50.

6 - Dummy class 32-69 covers for 1960 the content of 1961 classes 31-69 and 33-69.

7 - Dummy class 32-84 covers for 1960 the content of 1961 classes 31-84 and 33-84.

8 - Class 31-90 accounts in 1961 for most of the value included in dummy class 32-90 in 1960.

9 - Class 31-91 accounts in 1961 for most of the value included in dummy class 32-91 in 1960.

10 - Dummy class 32-99 covers for 1960 the content of 1961 classes 31-99 and 33-99.

11 - 1960 value for class 33-27 included in class 31-27.

12 - 1960 value for class 33-44 includes 1960 value for class 33-45.

13 - Dummy class 36-69 covers for 1960 the content of 1961 classes 35-69 and 37-69.

23 - 1960 figures have broader coverage than do those for 1961. See page ii.

24 - 1960 value for this class includes part of content of class 68-30. This may affect comparison for some countries.

25 - 1960 value for class 155-99 includes most of content of 1961 class 155-39. This may affect comparisons for some countries.

26 - 1960 value for class 157-99 is almost equivalent to the sum of 1961 values for classes 157-09, 157-49, 157-69 and 157-99.

27 - These dummy classes cover classes of the former classification whose value in 1961 would be included largely or entirely in Section II, but which can not be assigned to specific groups or divisions of Section II.

67 - Value for 1960 partly included in dummy classes 499-90 and 499-92.

68 - Dummy class 442-98 includes for 1960 the goods included in 1961 classes 442-49 and 442-99.

69 - Dummy class 443-60 includes for 1960 most of the goods included in 1961 classes 443-29 and 443-59.

70 - Dummy class 444-98 includes for 1960 the goods included in 1961 classes 444-30 and 444-99.

71 - 1960 value for class 449-59 is equivalent to 1961 value for classes 449-20 and 449-59.

72 - 1960 values for this class may be either overstated or understated in individual cases. In such cases these will be balancing errors in class 451-29.

73 - Dummy classes 452-13 and 452-14 cover for 1960 the goods included in 1961 classes 452-04, 452-08 and 452-12.

74 - 1960 value for class 454-99 is almost equivalent to sum of 1961 values for classes 454-15 and 454-99.

106 - Dummy classes 789-10 to 789-50 cover classes of the former classification whose value belongs chiefly to 1961 group 780 but which could not be allocated to specific classes within the group. These dummy classes include all or a major part of the 1960 value for 1961 classes 780-19 to 780-49, 780-69 and 780-99.

108 - Classes 790-39 and 790-99 together cover almost the same goods in 1960 and 1961, but 780-39 has more limited coverage in 1960 than 1961, 780-99 more extensive coverage in 1960 than 1961.

109 - Part of the 1960 value for this class is included in dummy class 960-97.

110 - Dummy class 860-98 includes only a small part of the 1960 value of 1961 class 860-99.

111 - 1960 value for class 870-99 includes most of 1960 value for several other classes in group 870, especially 870-49, 870-75 and 870-79.

112 - 1960 value for class 880-35 includes most of 1960 value for class 910-39.

113 - Classes 890-49 and 890-99 together cover almost the same goods in 1960 and 1961, but 890-49 has more limited coverage in 1960 than 1961, 890-99 more extensive coverage in 1960 than 1961.

114 - Classes 900-19 and 900-99 together cover most of the same goods in 1960 and 1961, but 900-19 has more extensive coverage in 1960 than 1961, 900-99 more limited coverage in 1960 than 1961.

115 - Dummy class 900-25 covers in 1960 almost the same goods as are included in 1961 classes 900-23 and 900-24.

116 - 1960 value for these classes has more restricted coverage than do figures for 1961.

117 - Dummy class 960-24 covers for 1960 goods included in various classes of Section V, especially class 960-25.

118 - 1960 values for this class may be either overstated or understated for some countries.

119 - 1960 values for these classes include some goods classified elsewhere in Section V in 1961.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

COMPARISONS OF 1961 EXPORT COMMODITY STATISTICS WITH THOSE FOR EARLIER YEARS

The introduction of the new Export Commodity Classification in January, 1961, made it difficult to compare commodity totals for 1961 with those for earlier years. Even where the content of a 1961 commodity class was the same as that of a 1960 class there were differences in codes and often in descriptions which tended to obscure comparisons. To assist users in overcoming comparison problems, the earlier 1961 issues of this report presented comparative figures for 1960 on the basis of a preliminary convertibility key which was included in the January-March report. This key has now been revised and corrected, and the comparisons presented in this report have been prepared using the revised key.

The convertibility key between 1961 statistics and those for earlier years is based on a thorough study of export entries received during the months of August, 1959, and April, 1960, which were coded to both the old and the new classifications and cross-tabulated, together with additional studies of the content of the large "n.o.p." classes of the old classification in 1959 and 1960, and studies of the content of several of the "n.e.s." classes of the new classification in 1961. The key as presented on the following pages provides a basis for obtaining the 1960 equivalent of 1961 totals where such equivalents are readily available. An expanded version of this key, which will also provide a basis for obtaining 1961 equivalents of 1960 statistics, will be published either as a reference paper or in Vol. II of the annual Trade of Canada report for 1961-62.

The convertibility key presented here differs from the information contained in the Export Commodity Classification. The Classification showed, for each 1961 class, the 1960 classes in which the content of the 1961 class had previously been coded. In many cases this resulted in showing against 1961 classes the codes of 1960 classes which accounted for a negligible proportion of the 1961 totals. Such a detailed presentation was necessary for the guidance of the staff engaged in preparing export statistics; for analytical use it was often of little value. The key presented in this report omits details believed to be of minor significance.

The revised convertibility key shows all comparisons believed to be valid between statistics for 1961 and those of 1960. In some cases the comparison is a simple one: one 1961 class is compared with one 1960 class. In other cases it is complex: one 1961 class may be compared with a sum of 1960 classes, or a sum of 1961 classes with one 1960 class, or a sum of 1961 classes with a sum of 1960 classes. There are likewise two levels of validity: some comparisons are believed to be fully accurate, others nearly accurate (usually about 90% or better). The level of validity of each comparison is indicated in the "notes" column of the key, and footnotes indicate the procedure for making comparisons involving the sum of 1961 classes and also the limitations of nearly accurate comparisons whenever these are less than 90% valid.

This key eliminates many of the "dummy" classes used in the original January-March version, and is much more amply noted than its predecessor. Many invalid comparisons whose limitations were revealed by later work have been eliminated, and some additional comparisons have been made as the result of further analysis. One class has been renumbered since the earlier key was prepared: class 436-09 is now class 264-31. There have also been two changes from the figures presented in the monthly export report for December 1961: class 399-45 has been included with class 399-99, and class 580-17 with class 580-19. These latter changes bring the classes concerned in line with statistics for 1962.

One major limitation of the earlier key remains applicable to the present version: all comparisons are based on analysis conducted at the class total level, not on the class-by-country level. Persons interested primarily in trade with specific partner countries should bear in mind that individual country comparisons may be distorted by special factors not accounted for in the convertibility key.

The following tables show the number of 1961 commodity classes, and the value of trade in 1961, for which comparisons of different types may be made.

The tables illustrate clearly that, notwithstanding the change in classification, comparisons between statistics for 1961 and 1960 are possible for most of Canada's export trade. For 53% of the classes of the new classification a simple comparison can be made with 1960 statistics, and these classes accounted for 81% of the value of export trade in 1961. Complex comparisons can be made for an additional 32% of the classes accounting for a further 16% of the value of exports. For only 15% of the classes of the new classification are comparisons impossible, and these accounted for little more than 3% of the value of export trade in 1961.

The tables also reveal the greater emphasis placed on end products and fabricated materials in the Export Commodity Classification than in the old classification. For end products only 35% of the classes accounting for 45% of the value of these exports are suitable for simple comparisons, while 40% of the classes accounting for 39% of the value of these exports require complex comparisons, and no comparisons are possible for 25% of the classes covering the remaining 16% of the value of exports of end products. For fabricated materials the pattern is less extreme; simple comparisons are possible for 49% of the classes and 76% of the value, complex comparisons for 32% of the classes and 21% of the value, and no comparisons can be made for 19% of the classes accounting for 3% of the value. In other sections comparisons are possible for almost all classes and at least 99% of the value of exports.

CONVERTIBILITY KEY FROM 1960 COMMODITY CLASSIFICATION TO 1961 COMMODITY CLASSIFICATION

- NOTES: (i) Column 1, "1961 Class", shows the class code under which the figures referred to are presented in 1961 reports. The key lists all classes in 1961 numeric order.
- (ii) Column 2, "1960 Equivalent", shows the class code or codes under which the figures referred to were presented in 1960 reports. In a few cases a percentage follows the 1960 class code; this indicates that only the specified proportion of the 1960 class is included against the relevant 1961 code.
- (iii) Column 3, "Notes", contains an alphabetic code indicating the type of comparison and a numeric footnote reference if required. The meaning of the alphabetic code is as follows:
- a : 1961 and 1960 statistics are fully comparable within the limits of any qualifications set forth in footnotes.
 - b : 1961 and 1960 statistics are nearly comparable (coverage about 90% the same) within the limits of any qualifications set forth in footnotes.
 - c : 1961 class has no equivalent in 1960 figures. All such references are footnoted.
 - d : A non-existent or "dummy" class for which no 1961 data are compiled, but which contains all or part of one or more 1960 classes. All such references are footnoted.
- (iv) An asterisk in column 1 means that other 1961 classes must be added to the specified class to obtain the equivalent of the totals shown for 1960. An asterisk in column 2 means that the 1961 class in question is part of a complex comparison although no 1960 codes are shown. All such cases are footnoted.

22 - 1960 value for class 62-65 is included with class 62-69 and dummy class 199-10.

23 - Dummy class 199-10 covers for 1960 the content of 1961 classes 68-30, 68-99 and 97-99, most of 1961 classes 62-99, 64-99 and 152-59 and part of 1961 classes 62-65, 144-76, 144-99 and 146-99.

24 - 1960 value for class 65-20 is included with class 65-49.

25 - 1960 value for class 71-51 is included with class 71-59.

26 - 1960 values for classes 71-66 and 71-75 are included with class 71-89.

27 - Dummy class 74-06 is equivalent to the sum of 1961 classes 74-03 and 74-05.

28 - 1960 value for class 77-99 is included with class 78-99.

29 - 1960 values for classes 91-35, 91-60 and 91-75 are included with class 91-99.

20 - 1960 value for class 51-99 is included with class 142-99.

23 - Dummy class 199-10 covers for 1960 the content of 1961 classes 68-30, 68-99 and 97-99, most of 1961 classes 62-99, 64-99 and 152-59 and part of 1961 classes 62-65, 144-76, 144-99 and 146-99.

30 - 1960 class 101-99 includes only about 80%-85% of the value which would have been recorded in 1961 for 1960 class 700. The balance of 1960 class 700 is included in 1961 classes 104-99 and 146-99.

31 - 1960 value for domestic exports in class 110-39 includes both tea blended or repackaged in Canada and tea products processed in Canada. The 1961 value includes only tea products processed in Canada; tea blended or packaged in Canada is treated as a re-export from January 1, 1961.

32 - Dummy class 499-10 covers the content of 1961 classes 120-49, 219-99, 393-99, 398-59, 398-79 and 490-60, and part of 1961 classes 213-99, 399-99, 421-99, 428-40 and 429-99.

33 - 1960 value for class 144-76 is included with class 155-99 and dummy class 199-10.

34 - 1960 value for class 144-99 is included with dummy classes 199-10 and 199-20.

35 - 1960 value for class 146-99 is included with class 101-99 and dummy class 199-10.

36 - 1960 values for classes 151-40 and 155-39, most of the 1960 value for class 152-99 and part of the 1960 value for class 152-19 are included with class 155-99.

37 - 1960 value for class 152-10 and part of class 152-19 are included with class 152-39.

38 - 1960 value for class 152-19 is included with classes 152-39, 155-99 and 157-99.

54 - 1960 values for classes 253-90 and 255-40 are included with class 259-99.

55 - 1960 class 6310 included both platinum contained in ores and platinum as refined metal. The platinum included in domestic exports was chiefly in the form of ores and concentrates which are now included in class 256-29. The platinum included in re-exports was chiefly in the form of refined metal which is now included in class 455-29. Thus class 6310 is compared with 256-29 in tables of domestic exports (actually the comparison is with the sum of 256-29 and 455-29), but with 455-29 in tables of re-exports.

- 55 - 1960 class 6310 included both platinum contained in ores and platinum as refined metal. The platinum included in domestic exports was chiefly in the form of ores and concentrates which are now included in class 256-29. The platinum included in re-exports was chiefly in the form of refined metal which is now included in class 455-29. Thus class 6310 is compared with 256-29 in tables of domestic exports (actually the comparison is with the sum of 256-29 and 455-29), but with 455-29 in tables of re-exports.
- 57 - 1960 value for class 259-20 is included with class 459-25.
- 112 - 1960 value for class 451-49 includes most of the 1960 value for class 451-29 and about half of the 1960 value for class 469-65.
- 113 - 1961 class 451-32 includes only about 80%-85% of the value which would have been recorded in 1961 for 1960 class 6027. The balance of 1960 class 6027 is included in 1961 class 451-49 and dummy class 499-50.
- 114 - Dummy classes 452-13 and 452-14 are equivalent to the sum of 1961 classes 452-04, 452-08 and 452-12.
- 115 - 1960 value for class 452-85 is included with class 452-99, but 1960 classes 6095, 6110 and 6210 would have included only about 80%-85% of the value actually recorded for the two 1961 classes. The balance of the 1961 classes is derived from 1960 class 6680, which is included in dummy class 499-60.
- 116 - 1960 value for class 453-09 is included with class 453-49.
- 117 - 1960 value for class 454-15 is included with class 454-99.

- 182 - 1960 value for class 960-99 is included with class 780-99 and dummy classes 969-40 and 969-70.
- 183 - 1960 class 9080 included all packing material valued separately on export entries, whereas from January 1961, export packing has, whenever possible, been included with the value of the goods exported, except for re-usable containers which are included in class 970-10. The lower comparative figures for 1961 therefore reflect a change in procedures rather than areal change in trade.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
